# CERBERUS Video Security System
Quick Start Installation Guide

---

1 Install Cerberus Plug & Play Router

- Unplug connection from existing computer or router at Internet modem end and plug into Cerberus Router (Red Lines).
- Connect cable from WAN port on Cerberus router to Internet modem (Blue line).
- Unplug Internet modem from power for 30 seconds (resets connection).
- Connect Cerberus 110 vac power supply.

Cerberus Router

Internet Modem

Move cable from Here to There (one of the router ports)

Connect cable between units

---

2 Install Cerberus Camera

-Fasten Camera to wall or shelf with provided mount(s).
- Mount Motion detector.
- Connect Green plug from Motion Detector to Camera
- Connect power supplies to 110 VAC adapter and camera.
- Camera make take a few minutes to first initialize itself.

Install 3 screws through base for wall mount

Connect power adapter from wall receptacle to matching socket on the bottom of the camera

Mount motion detector with supplied Velcro tabs (or screws). Mount with the same view as camera.

Note: For higher reliability connect Camera to Router with standard Internet cable (not included)

---
